Health – Recording and reporting of accidents and incidents

Health

Recording and reporting of accidents and incidents

Policy statement

We follow the guidelines of the Reporting Injuries, Diseases and Dangerous Occurrences (RIDDOR) for the reporting of accidents and incidents. Child protection matters or behavioural incidents between children are NOT regarded as incidents and there are separate procedures for this.

Procedures

Our accident sheets:

- are kept in a safe and secure place;
- are accessible to all staff and volunteers, who all know how to complete them; and
- are reviewed at least half termly to identify any potential or actual hazards.

Reporting accidents and incidents

- Ofsted is notified as soon as possible, but at least within 14 days, of any instances which involve:
 - food poisoning affecting two or more children looked after on our premises;
 - a serious accident or injury to, or serious illness of, a child in our care and the action we take in response; and
 - the death of a child in our care.
- Our trustees are notified as soon as possible. A confidential report is compiled for trustees and stored securely. The report and circumstances are updated and added to the agenda for future committee meetings. Safeguarding is considered and if the threshold for reporting has been met, this is done immediately in line with procedures.
- Local child protection agencies are informed of any serious accident or injury to a child, or the death of any child while in our care and we act on any advice given by those agencies.
- Any food poisoning affecting two or more children or adults on our premises is reported to the local Environmental Health Department.
- We meet our legal requirements in respect of the safety of our employees and the public by complying with RIDDOR. We report to the Health and Safety Executive (HSE):
 - Any work-related accident leading to an injury to a member of the public (child or adult), for which they are taken directly to hospital for treatment.
 - Any work-related accident leading to a specified injury to one of our employees. Specified injuries include injuries such as fractured bones, the loss of consciousness due to a head injury, serious burns or amputations.

- Any work-related accident leading to an injury to one of our employees which results in them being unable to work for seven consecutive days. All work-related injuries that lead to one of our employees being incapacitated for three or more days are record in our accident log.

- When one of our employees suffers from a reportable occupational disease or illness as specified by the HSE.

- Any death, of a child or adult, that occurs in connection with a work related accident.

- Any dangerous occurrences. This may be an event that causes injury or fatalities or an event that does not cause an accident, but could have done; such as a gas leak.

- Information for reporting incidents to the Health and Safety Executive is provided in the Pre-school Learning Alliance's Accident Record publication. Any dangerous occurrence is recorded in our accident log.

When there is any injury requiring general practitioner or hospital treatment to a child, parent, volunteer or visitor or where there is a death of a child or adult on the premises, we make a report to the Health and Safety Executive using the format for the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations.

Our incident sheets

- We have ready access to telephone numbers for emergency services, including local police. Where we rent premises we ensure we have access to the person responsible and that there is a shared procedure for dealing with emergencies.
- We ensure that our staff and volunteers carry out all health and safety procedures to minimise risk and that they know what to do in an emergency.
- On discovery of an incident, we report it to the appropriate emergency services – fire, police, ambulance – if those services are needed.
- If an incident occurs before any children arrive, our manager risk assesses this situation and decides if the premises are safe to receive children. Our manager may decide to offer a limited service or close the setting.
- Where an incident occurs whilst the children are in our care and it is necessary to evacuate the premises, we follow the procedures in our Fire Safety and Emergency Evacuation policy or, when on an outing, the procedures identified in the risk assessment for the outing.

- If a crime may have been committed, we ask all adults witness to the incident to make a witness statement including the date and time of the incident, what they saw or heard, what they did about it and their full name and signature.
- We keep an incident sheet for recording major incidents including those that are reportable to the Health and Safety Executive as above.
- These incidents include:
 - break in, burglary, theft of personal or the setting's property;
 - an intruder gaining unauthorised access to the premises;
 - fire, flood, gas leak or electrical failure;
 - attack on an adult or child on our premises or nearby;

- any racist incident involving staff or families on the setting's premises;
- the death of a child or adult; and
- a terrorist attack, or threat of one.

- In the incident sheet we record the date and time of the incident, nature of the event, who was affected, what was done about it – or if it was reported to the police, and if so a crime number. Any follow up, or insurance claim made, should also be recorded.
- In the unlikely event of a terrorist attack we follow the advice of the emergency services with regard to evacuation, medical aid and contacting children's families. Our standard Fire Safety Policy will be followed and staff will take charge of their key children. The incident is recorded when the threat is averted.
- In the unlikely event of a child dying on the premises, for example, through cot death in the case of a baby, or any other means involving an older child, the emergency services are called, and the advice of these services is followed.
- The incident sheet is not for recording issues of concern involving a child. This is recorded in the child's own file.

Legal Framework

- Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR) 1995 (As Amended)

Further guidance

- RIDDOR Guidance and Reporting Form: www.hse.gov.uk/riddor
